**Specializing in:
Deep Foundations
Shoring Systems
Micro Piles**

Project:

Carmel/Clay Board of Parks and Recreation Central Park Community Recreation Center. The design incorporated an elevated boardwalk adjacent to a lagoon.

Solution:

Helitech® installed over *Three Hundred* Helical Piles to accommodate the design criteria for support of the proposed boardwalk. The **Helical Pile System** utilized a 2 7/8" diameter galvanized special alloy steel shaft with a helical plate situated at the bearing end of each pile. The helical plate aided in the installation of the pile as it pulled the shaft down into competent bearing strata. The **Helical Pile System** is ideal not only for this application but for many other conditions where access, equipment concerns, convenience, and efficiency are requirements.

Resolution:

Helitech® completed the installation of the Helical Piles, providing a sound foundation on which the boardwalk could be built, in a timely and cost effective manner.
